Randex can offer a bespoke box design service.

Landscape Lever Arch Files

The Landscape Lever Arch File has been designed to create the optimum use of all standard filing equipment. This is achieved because the overall height is 270mm as apposed to the traditional Portrait Lever Arch File which is 340mm in height. The Landscape File also has a bend back spine enabling it to be used on at a work surface efficiently.

- RAN-2940-BLUE Lever Arch File. Mechanism on the Long Edge
- RAN-2943-GREY Ring Binder. Mechanism on the Long Edge
