

DIMENSIONS

TIMES-2[®]

THE FAST ACCESS, HIGH DENSITY,
SPACE EFFICIENT FILING SYSTEM

TIMES-2®

- *Times-2* is a high density, double-sided filing system simply operated by the use of a foot pedal. The inner cube has 2 usable sides which rotate on a fixed base. The operator is able to access these from one side. Without doors or shutters, units offer efficient use of floor space by sitting close to walls or screens
- 50% of your filing is easily accessible at any time
- No doors or handles
- Secure locking system with further enhancements if required
- Flexible planning
- Versatile
- Greater capacity and space saving
- Time saving
- Adaptable

FLEXIBLE PLANNING

NEXT TO WALL OR PANEL

Times-2, when positioned next to walls or partitions, increases both capacity and access to stored information. Capacity will increase from a minimum of 40% to a maximum of 200% growth. Faster retrieval times are standard with *Times-2*. 50% of all documents are immediately available to the operator. The other half is only a gentle rotation away. To allow for full rotation of *Times-2*, a rotation space must be designed into the plan. The rotation space can be concealed with the addition of a wall closing strip, and at the top with the addition of an extended canopy.

BACK-TO-BACK

Tier-per-tier, *Times-2*, when placed in a back-to-back configuration, delivers the maximum possible storage capacity in the defined floor space. The secret is the elimination of entire aisle ways - yet access is never compromised. Half of the stored material is still available for immediate retrieval, and the other half remains only a gentle rotation away. The rotation space between back-to-back units may be planned as either single or double-depth. Appropriately sized wall-closing strips are available for each dimension. Extended canopy tops are also available to conceal the rotation space from above. In shorter heights, custom wood tops are also an attractive option.

ACCESS APPLICATIONS: ROOM DIVIDER

In addition to filing and storage capacity gains, *Times-2* delivers cost reduction and productivity benefits. When used as a room divider *Times-2* defines departmental space, eliminates the cost of construction or office screens, and still provides increased access to all stored materials. The dual foot pedal option must be specified in this application. The double-depth design of *Times-2* means that both sides of the unit are accessible simultaneously when used as a room divider. When closed, access is denied to both sides.

VERSATILITY

Times-2 is capable of holding a complete range of media. Each unit is configured to the requirement of the user. The following are available in addition to standard reversible shelves and dividers.

ROLLOUT REFERENCE SHELF

Our most popular accessory. The 5-, 6-, 7- and 8-tier models accept the *Rollout Reference Shelf* with no loss of filing space when used with standard shelves

SECURITY DRAWER

Confidential documents stay safe and secure. The drawer features a double bitted key lock and recessed drawer handle.

ROLLOUT DRAWER WITH HANGING FOLDER FRAME

Times-2 will handle all of your hanging folder requirements. Drawers can be stacked (1) per tier for complete hanging folder storage.

ROLLOUT CD-ROM DRAWER

Drawer front and back are slotted every 25mm for adjustability. Dividers run the full length front to back. Adjustable slotted drawers allow for easy storage.
