

LabelsAnywhere is Colorflex's new Web-based, cost-effective online solution allowing you to effectively print brilliant color-coded labels with bar codes and graphics right at your desk.

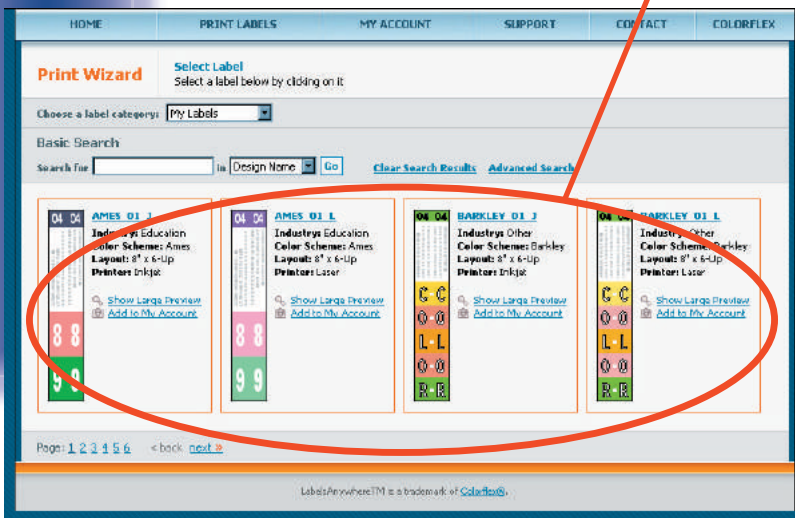

## Any label. Any time. Anywhere

Colorflex's goal is to provide you with a turn-key file management solution that maximizes the power and convenience of the Internet, allowing you to print labels ANYWHERE, while maintaining total confidentiality and security. Data never leaves your computer.

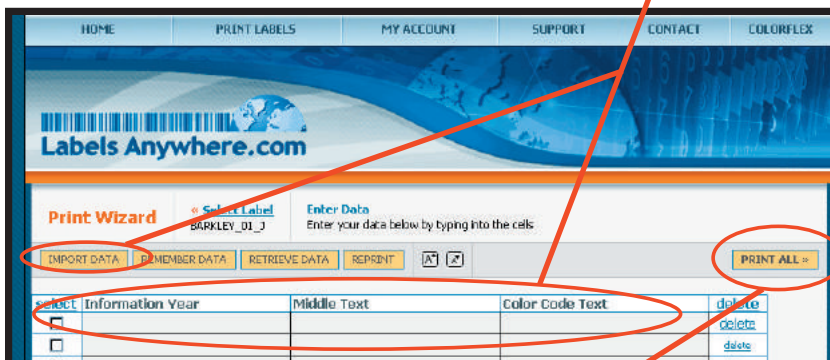

## Easy as 1 - 2 - 3

LabelsAnywhere is straightforward and easy to use. You can begin printing custom labels in three simple steps using the intuitive Print Wizard:

### 1. Choose your label design

### 2. Enter or import your data

### 3. Print your label

## Key Features

Whether you print one label per day or thousands, LabelsAnywhere is an easy and economical solution to managing your filing systems!

- Print labels hassle-free – No driver or software installation; new features are automatically delivered via the web to ensure you are *always* using the most up-to-date version allowing for a maintenance-free experience
- Use virtually any color printer to achieve vibrant color-coded labels
- Print high-quality bar codes – without downloading special fonts (**exclusive to LabelsAnywhere**)
- Select your label from an ever-increasing library of label designs or have custom labels designed specifically for your needs by the experts at Colorflex
- Track label inventory automatically (**exclusive to LabelsAnywhere**)
- Recover and reuse data without re-keying with the “Remember Data” tool (**exclusive to LabelsAnywhere**)

## Benefits

- 1) You set up the system administrator who can add and delete users as needed, preserving the security of your data
- 2) Unlimited use — anyone you designate can print the labels they need where and when they need them
- 3) Ability to efficiently handle infinite simultaneous users
- 4) Total confidentiality and security – data never leaves your computer
- 5) Match your existing color-coded systems or customize with the help of your Colorflex dealer or the Colorflex exclusive online design and training service
- 6) Easy-to-use Web-based administration puts you in complete control

## System Requirements

- Internet connection
- Microsoft® Internet Explorer version 6.0 or higher
- Windows® 98, 98SE, ME, 2000, XP and NT workstation 4.0
- RAM: 64MB or greater

## Settings

- JavaScript™ must be enabled
- Colorflex recommends having cookies enabled

## Active X

- System must allow for a VeriSign™ ActiveX control (ActiveX will download in approximately 4 minutes using a 56K modem)

## About Security

*Colorflex engineers have built security into LabelsAnywhere.*

- You set up the System Administrator who can add and delete users as necessary. You control who uses your LabelsAnywhere account at any given time
- Your data is secure. Although LabelsAnywhere is a Web-based product, all of your data resides safely on your computer — and stays there
- Before leaving your computer, you can logout to protect your data

## About Barcodes and Graphics

- Print Grade A barcodes *without downloading special fonts* — a feature exclusive to LabelsAnywhere
- Incorporate graphics, logos and special marks as needed

## About Color Printers

*LabelsAnywhere will work with virtually any color laser or ink jet printer. However, Colorflex recommends and sells the HP 1100DTN inkjet and the Okidata C7300N laser printer. These printers offer the latest technology in their platform and deliver speed and performance at competitive prices. Here are some of the features of each:*

### **HP 1100DTN Color Inkjet**

- Network ready
- Approved to run label stock
- Prints color 4 ppm (pages per minute) for label stock
- 4800 x 1200 dpi (dots per inch) resolution

### **Okidata C7300N Color Laser Printer**

- Network ready
- Approved to run Colorflex label stock
- Prints color 11 ppm (pages per minute) for label stock
- 1200 x 600 dpi (dots per inch) resolution
- Single Pass Color Digital technology for printing on media up to 110-lb.
- Powerful 450 MHz PowerPC 750 processor
- If purchased through Colorflex, custom driver and firmware provided to optimize the color palette and print settings for Colorflex label print solutions

## About Colorflex Label Stock

*Colorflex offers an array of label sizes on high-quality label stock that can be used with LabelsAnywhere. Whatever your labeling needs, Colorflex can provide the label stock. Contact your Colorflex dealer to learn more.*
